COMMERCIAL JET RECEIVES BRAZILIAN REPAIR STATION CERTIFICATION

MIAMI, FL --January 12, 2010-- Commercial Jet, a trusted integrated service provider to the world's leading airlines, owners and operators, has received repair station certification from Agencia Nacional de Aviação Civil (ANAC), Brazil's civil aviation agency.

"With our strategic hemispheric location in Florida, we can provide rapid repair and maintenance services to Brazilian-certified aircraft," said David Sandri, president of the privately held company. "Our focus on integrated aviation services allows our well-trained team to deliver exceptional value to our growing worldwide customer base."

The Brazilian certificate (Certificado de Homologação de Empresa) was issued on December 2, 2009 and applies to Boeing 707, 727, 737, 757 and 767 series; McDonnell Douglas MD-11 and DC10 series; and Airbus A300, A310, A319, A320 and A321 series. It also covers specialized non-destructive testing services, including eddy current, ultrasonic, magnetic particle and radiographic

About CJI

Known worldwide for advanced MRO solutions, Commercial Jet is a global leader in the aviation services sector with a fully integrated approach that meets the demanding requirements of the world's leading airlines, as well as aircraft owners and operators. Commercial Jet specializes in heavy maintenance and modification services, complete airframe inspection, freighter conversions, interior modifications and avionics upgrade programs. Our high value MRO solutions include A, B and C checks, phase checks, updates to aging aircraft, corrosion repair, component overhaul management, freighter conversion and aircraft aesthetic services. We also offer lease return services, refitting passenger and cargo aircraft for return to market.
